Driven Frontend Developer As a passionate 3rd-year Computer Science student pursuing a B.Tech degree, I specialize in creating intuitive, responsive, and visually engaging user interfaces. My hands-on experience in frontend technologies like HTML, CSS, JavaScript, and React.js allows me to craft seamless digital experiences that prioritize both functionality and design. With a strong foundation in programming, algorithms, and data structures, I have developed practical expertise through numerous projects that merge creativity with technical skills. I'm eager to apply my academic knowledge to real-world challenges, continuously refining my skills in web development, problem-solving, and . Known for my collaborative approach and proactive learning attitude, I thrive in dynamic teams and am deeply committed to growth in the evolving field of frontend development.

Professional Experience

Aspiring Frontend Developer I am a motivated Computer Science student, currently in my 3rd year of B.Tech at Ajay Kumar Garg Engineering College, Ghaziabad. With a solid foundation in web development, programming, and computer science principles, I am seeking a beginner role to apply and expand the technical knowledge I have gained throughout my academic journey. my coursework and personal projects have provided me with hands-on experience in HTML, CSS, JavaScript, and React.js. I am eager to contribute my skills to real-world projects, while learning and growing in a collaborative, team-oriented environment.
